1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.
2. Authorization for this examiner's amendment was given in a telephone interview with attorney David Josephs on January 12, 2009.
3. The application has been amended as follows:

Claim 13 lines 5-6, the phrase "capable of calculating and displaying" has been replaced to read --that calculates and displays--.

Allowable Subject Matter

4. Claims 13-22, 24, 30 and 32 are pending and allowed.
5. The following is an examiner's statement of reasons for allowance:

The closest prior art of Lear (US 6,912,509 B1) teaches invest a lump sum amount in order to return N periodic installments at a specified confidence level. A set of candidate investment instruments is selected from a universe of investment instruments. Data regarding the returns of the candidate investment vehicles during preceding periods is collected. Based on the data, minimum expected returns at the confidence level (MER) from each investment vehicle at the return date of each installment is compiled. Investment vehicles are selected for each of the N periods, with the selection criteria maximizing the MER for each of the respective periods. A normalization factor is developed that is based on the MERs of the selected investment

vehicles, for the associated respective periods. An amount is allocated to each selected investment vehicle, and the allocated amount is established in accordance with a respective investment factor attributed to each investment vehicle, where the investment factor is based on the MER of the investment vehicle at a corresponding installment date.

In regarding to independent claim 13, Lear taken either individually or in combination with other prior art of record fails to teach or render obvious calculating and appending to the data record for each book-valued fund within the data set a normalized value for the average and volatility of its periodic investment returns as standardized against the average and standard deviation of the average of periodic returns and volatility of periodic returns for the asset-class population; appending a notation to the data record of each fund identifying it as uniquely belonging to one of a plurality of population-areas within a plot of the points of prior-period investment performance for the population of the asset-class, when formulated as a two-dimensional spatial distribution and sectioned so that the boundaries of such population-areas are drawn through the points of standardized average returns and standardized volatility of returns that would result in the division of the population distribution into plural areas of equal numbers of book-valued funds under the assumption that the asset-class population is uniformly random and forms a normal distribution about a central point for said population distribution; counting the population of said book-valued funds in each of said population-areas; appending a count of that population-area to the data record of each book-valued fund within that population area; appending to the data record for

each book-valued fund a notation identifying a rank based on the population size of its population area relative to all other population area with the data set; and selecting for future investment those book-valued funds from within the data set that are found in at least one said population-areas having a high measured population size ranking, relative to all ranks, when so ranked

6. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
